

# ENERGY SAVING VALVES

**NEW**

Our new **runcool™** technology cuts power consumption by up to 50% and runs cooler. Significantly reducing operating temperature (up to 30%) and increasing safety and efficiency.

Using a fraction of the energy of traditional gas solenoid valves, giving you an overall reduction in the electricity running costs and the carbon footprint.

## AUTOMATIC ON/OFF ENERGY SAVING

**SUPPLY VOLTAGE 230 VAC 50/60HZ**  
Class A. EN161 & DIN3391 to 3394, normally closed.
